Adobe Flash Adobe Flash is a multimedia application that enables you to create animations, multimedia presentations, and other interactive content. The most popular version is CS6, available for both Mac and Windows PCs. It uses a similar interface to Adobe Photoshop, and as with Photoshop, Adobe has a whole range of tutorials available for any Flash programmer. You can use Flash to create animations of your image, or even for creating animations with an already created shape. The possibilities are endless with Flash, and it is an excellent way to showcase your work on a website or in a promotional video. We discuss Flash in much more detail in Chapter 21.
