The Void Rangers are a special kind of defense force, standing on the front-line of our universe. They have been created by the Glowing Light in order to protect our galaxy from external threats. You play as one of the Void Rangers. You are being transported to our solar system, where a darkness has taken over our planets. A small group of inhabitants was able to escape to our ship. Now your mission is to explore each solar system in the galaxy in order to save our planet and humanity. Your spacecraft is equipped with weapons and you have access to the void equipment. Here you find customization possibilities for weapons, armor, and more. Void Rangers is a light-hearted arcade game. There is no challenge, so no wall to lean on, no frustration, and no room for mistakes. There are some people that just want to have fun, without pressure. We wanted to make a game that we could play even if our friends was breaking it apart, even if our wife was crying, even if they wanted to smash our monitor. This is the key to make a successful game. It is pretty awesome, what you are able to do with the game. For example we can combine weapons and stats together with the stats suit, we can fuse weapons together. There are also many cool features. If you press S on your Oculus, you are taken back into the main menu. If you press the Up Arrow on your Vive, you go to a quick play mode, if you press forward on the touchpad you are going to the pause menu. There are many features that I do not want to spoil for you, just try it out. --- If
