The application can help you with learning the vocabulary by giving you a game like experience with cards with only words on them. The purpose of a word game is to learn vocabulary by doing. It is similar to flashcard usage. The cards can be created in different kinds of decks. You can take words from the dictionary and create a quiz card deck. There are a few keyboard shortcut options to help you create cards faster. You also get options for multiple decks, image and text overflow. A special option to show word-by-word matches in a quiz card window is also available. With this option you can view the correct answer and see the explanation right next to it. You can also mark this option if you want to review a particular deck later. * Be careful with image masking. If you mask an image without double checking, you may get a "format not found" error when starting the application. If you want to learn Spanish, you can take the words from the Open Dictionary and turn it into a quiz card deck. This way you can practice learning with only spoken words. Or you can create a quiz card deck with your own words from a dictionary. The application also has some kind of automatic content generated. The application automatically creates a quiz for every deck that you can enable. In addition to all the automatic features, you can create quiz cards using the visual method too. If you do a search for a particular word on the web, you can use the web browser with the application and copy and paste the result as a card. The Note Taker Lite for Windows application allows you to take notes and record voice notes. You can also import image files from your camera roll and paste them into your notes. You can also save your data to the Dropbox cloud server. The program is free and easy to use and it does not require to create an account to use it. The application is available in both a portable and a desktop version. * Be careful with image masking. If you mask an image without double checking, you may get a "format not found" error when starting the application. If you want to make a voice note or record a voice note using the Note Taker Lite for Windows application, make sure to enable the microphone. The application can only record voice notes if the microphone is enabled. In order to import an image from your camera roll or other folder as a note, you will need to enable the "Import selected photos from folder" option
