Meanwhile, the

San Francisco district attorney's office seeks to have the charges against the officer dismissed because the state failed to comply with a recent court order, San Francisco Public Defender Jeff Adachi said in a court filing Friday. "In October 2015, a judge ordered the prosecutor to disclose the name of an informant and any exculpatory evidence that he or she had heard," Adachi wrote. "Instead, the prosecutor disclosed only that the officer would testify about evidence collected at the crime scene and certain investigative leads." The informant "also provided the

police with the name of a suspect," Adachi said. "According to the officer's report, the informant told the police that he saw the officer with the suspect, who was at the officer's residence on two occasions." The informant also described the suspect's tattoos, Adachi said. "Other than the officer's report, the prosecutor never disclosed the informant's name or the substance of their conversations," Adachi said. He noted that the name and address of the informant was contained in a San Francisco Superior Court docket, and was also listed on the police

report. "The informant's testimony, in the absence of the substance of the conversations and other relevant exculpatory evidence, would most likely be inadmissible under the so-called informant's 'taint' doctrine," Adachi said. "The court should determine whether the prosecutor violated the judge's order by failing to disclose exculpatory information." Adachi then asked the court to release the name of the informant so he could represent the officer in the charges, which he says he believes violate the officer's civil rights. He called the charges
