Report this link as inappropriate.Richard Thaler and Cass Sunstein have an excellent paper in NBER working paper 1775, who argue that the disincentive effects of short-term incentives are much stronger than generally believed and that the results are harmful. We present a systematic investigation of the (at times surprising) consequences of short-term incentives on worker effort. Our evidence suggests that individual incentives to produce more work during a month lead workers to reduce their average level of work effort. A rational person'
