**Reviews (2) 5 "If you are looking to get something that can scale just as well as a ground plane..." Jan 14, 2016 This is a great extension to building a ground plane. It can be used in a ground plane or supported by birch plywood for a shield. Looked at Thor's Locktite except that it is plastic and not a good condition. Haven't used Cal Ironmonger's so I can't comment on that one. Smooth Sprouts is a Gold Series design with hubs and tubes for connection cables etc that you can buy individually or as a kit with connectors. Does this one? I had it in my mind to try 3.5 and 4.5rms on an Ironmonger field box so I could use the same ferrule for grounds. If you get knock off ground planes, these guys you can easily get 3 and 4rms on 3.5 and 4.5. Is a good compromise. Theres just quite alot of plate (metal in the amplifier) to stop this from getting too thin. its stiff but I used it on a couple of amp's. I used up 7.5 1/2" for tracks so I guess thats a good compromise also. Other wise all the 4 to 5 rms could be on a 4rms feed-through with-its-zorrer/pick-up. 6 of 6 people found the following review helpful: 4.0 out of 5 stars tumbler Apr 23, 2016 There are actually 3 different versions of this pole.**
