There are several ways to hack ... vendors: Cisco, DataTorrent,. IBM, Informatica, Kx Systems, Microsoft, ... a complete portfolio of delivery products. What happens after a virus attack? While most of us just know how to protect ourselves from a virus on the Internet, there are many people who only use basic tools that can provide protection against attacks. If you want to protect your company from hackers, you must be aware of these tools and how to use them. Are they part of your regular IT infrastructure, or do you just want to make sure your PC doesn't hit "bad" sites?
